

Week 3/Segment 1: How can I be creative and think possible?

Mission - Come up with a creative solution

Directions: Choose a problem...then choose an item from Column A and an item from Column B to combine to build a solution.

Possible problems:

- Your sister likes her music too loud.
- You never like what is for dinner.
- Your dog always wants to go outside in the middle of the night.
- You can never find all of the pieces to your favorite game.
- You are bored with all of the toys in your house.

Mission: Possible

A project of Einstein Academy
#doingthepossible

Pro Tip:

Think about the most creative solution you can... and then make it even more creative!

Column A	Column B
A baseball	Sugar
A flower	Grass
Water	Paper
A kangaroo	Books
A tent	A vacuum cleaner
A fork	Potato chips
Music	A stick

Now, think about a problem you are having and come up with a super creative solution!

Share your problem and solution with us
(MissionPossible@EinsteinAcademyCO.org)!

Mix it up...

- For ages 4-6 - Parents could do this activity with their children, modeling possibilities and encouraging as much creativity as possible.
- For ages 7-9 - Start with the activity in the guide and then come up with your own problem and solution. Think details - how exactly would the problem be solved?
