

# Week 2/Segment 5: How does really understanding my problem lead to a better solution?

**Mission** - Revise and launch the solution

Reflect on the following questions:

What feedback and additional information did you gather that could help you come up with an even better solution?

---

---

---

---

How might you use that feedback and information?

---

---

---

---

How did you come up with an even better solution?

---

---

---

Share with us what problem you solved, how you solved it, and how you made it an even better solution ([MissionPossible@EinsteinAcademyCO.org](mailto:MissionPossible@EinsteinAcademyCO.org))!

**Mission:  
Possible**  
A project of Einstein Academy  
**#doingthepossible**

### Pro Tip:

If you find that you need clarification, you can always go back to the people who gave you feedback and ask follow-up questions.

### Mix it up...

- *For ages 4-6* - Parents should help kids choose one or two pieces of feedback to be the focus when editing the solution.
- *For ages 7-9* - Explain how you used the feedback and additional information in making your solution even better. What changes did you make? Why did you make those changes? How did it make it even better?
