

Week 3/Segment 2: What is community?

Mission - Identify a community of which you are a part to solve a problem

Community brainstorming...

What communities connect to where you live?

What communities connect to what you do?

What communities connect to what you like?

What communities connect to where you go?

What communities connect to what you believe?

What communities connect to where you are from?

Mission: Possible

A project of Einstein Academy

#doingthepossible

Pro Tip:

Think about all of the possible communities of which you are a part. You can narrow them down later.

Mix it up...

- For ages 4-6 - Parents could help kids consider their communities by asking them questions about their activities and likes.
- For ages 7-9 - Consider what role each of these communities play for you. Are there communities that are more valuable to you? In what ways? What do you think defines a community?

Share your community with us (MissionPossible@EinsteinAcademyCO.org)!
